Professional Summary

Aspiring Web Developer with a strong foundation in HTML, CSS, JavaScript, React.js, Node.js, and Express.js, with backend experience in Python and FastAPI. Completed a MERN Stack internship and built and deployed full-stack web applications with REST APIs and JWT authentication. Passionate about building responsive, user-friendly, and scalable web applications.

Technical Skills

Programming Languages	Python, Java, SQL
Core Concepts	Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS
Frontend	HTML5, CSS3, JavaScript, React.js (Vite)
Backend	FastAPI, Node.js, Express.js
AI & Data	LangChain, ChromaDB, Pandas, dbt
Tools	Git, GitHub, Vercel, Render, Visual Studio Code

Education

Velalar College of Engineering and Technology, Erode — **2023 – 2027**
B.Tech in Artificial Intelligence and Data Science — CGPA: 6.92

Mother's Matric Higher Secondary School, Bhavani — **2023**
Higher Secondary (HSC) — 70%

Mother's Matriculation School, Bhavani — **2021**
SSLC — 95%

Internship Experience

Yellowmatics.ai — **Feb 2026**
MERN Stack Intern

- Completed MERN Stack Development training covering MongoDB, Express.js, React.js, and Node.js.
- Built responsive web application modules using modern web technologies.

Nurture Infotech — **Jul 2025**
Data Analyst Intern

- Analyzed real-world datasets to generate meaningful insights.
- Performed data cleaning, preprocessing, and reporting.

Projects

AI Legal Document Analyzer — **2026**
Technologies: React (Vite), FastAPI, PostgreSQL (Supabase), LangChain, ChromaDB

- Built and deployed a full-stack AI web app (React on Vercel, FastAPI on Render) for uploading legal PDFs and getting structured analysis and Q&A with page citations.
- Developed a RAG pipeline with token-based chunking, ChromaDB vector search, and a Groq-powered LLM via LangChain.
- Implemented JWT authentication, per-user document ownership, rate limiting, CORS, and paginated REST APIs.
- Added downloadable PDF analysis reports and a responsive UI built on a reusable CSS design system.

Smart Parking Management — **2026**
Technologies: Python, SQLite

- Developed an automated parking management system using Python and SQLite.
- Implemented parking token generation, loyalty pricing, and automated fee calculation.
- Integrated WhatsApp notifications for parking updates, improving efficiency through automated tokens and alerts.

OrderMetrics360 – E-commerce Business Analytics — **2026**
Technologies: BigQuery, dbt, SQL, Python

- Building an analytics pipeline on the Olist e-commerce dataset (9 tables) loaded into Google BigQuery.
- Created dbt staging models with unique and not-null tests to ensure data quality.

Certifications & Achievements

- NPTEL – Human Computer Interaction (Score: 80%)
- Paper Presentation – Plant Disease Prediction
- Workshop – Mobile Application Development
